The amendment received March 23, 2004¹ has been made of record. Claims 1-13 are pending.

The rejection contained in the previous office action is withdrawn in view of applicants' arguments.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2 and 4-13 are rejected under 35 U.S.C. 102(b) as being anticipated by EP '825.

EP '825 discloses adhesive compositions comprising two organosilicon components which are seen as meeting applicants limitations for components A and D. The reference further teaches by example the incorporation of silica such as claimed instantly. Component C of the reference is seen as meeting the requirements of applicants' component C.

Therefore the reference anticipates the rejected claims.

Claim 3 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
